Hi Folks. You have been chosen to review the attached list of 35 response proposals. The list has been culled down from 1800 proposals that EPA has received. We need you all to review - so we can get the top 10 list by 1 pm tomorrow. Please get your votes back to Gilberto Irizarry.

I have attached a ranking sheet, which lists each proposal, we need you to rank each proposal for 3 factors on a scale from 1 to 10, with 10 being the highest.

The list of projects is also attached, most proposals are between one and two pages, so this isn't a huge burden. We are waiting to see the technology proposals from the other agencies, including NOAA, USCG, etc., and have added MMS, NOAA and FWS contacts to review as well. Craig and Jim, you can reach out to RRTs as well. See below for more details on the color coding for the 35 projects.

Tomorrow, I will get you all a list of the containment proposals, in which we need to select the top 5 proposals.

As requested attached is a pdf file that contains 35 submissions on salt march remediation. These 35 were culled from about 1800 that were submitted to EPA.

Most of the submissions focused on chemical and biological agents that could be sprayed on the water, plants, soil/sand, and even the fauna. These will all fall into the NCP Product Schedule area.

In the attached file:

- yellow - NCP Product Schedule related - 21
- red - options that are likely to be considered - 6
- blue - are sorbents
